### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smith '196.

Smith teaches the claimed invention of a movable frame 2/2/4/20, a stationary frame 24/24/26/38/28/28, pairs of tools 18/40 and 22/30, and an actuator 31. Hence the prior art teaches the claimed invention excepting the use of two actuators as opposed to one actuator. It is well known in the art of sheet metal brakes to use paired cylinders/controls to provide for smooth and balanced travel to an elongated movable frame/tool of a sheet metal press. It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided the press to Smith dual actuators if so desired to provide for a balanced and smooth drive to the movable frame 2/2/4/20, such a provision would have been an obvious choice of tool design.

2. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. Claims 8-14 are allowed.
